

Information Security Service

Did you know information security enables your business to be successful? Due diligence is required to comply with current information security regulations. T.J. Maxx ignored compliance for 17 months and learned a costly business lesson.

DISC helps clients to comply with various regulations and standards and offers comprehensive solutions that address multiple threats and compliance needs.

Risk Management Life Cycle Process

It's about risk reduction

- Usually small to medium size companies don't have experienced information security professionals in their staff.
 - Most entrepreneurs and professionals fail to recognize the challenge of identifying and prioritizing the information security risks necessary for business to succeed and comply. Every business has faced this challenge to a greater or lesser degree.
 - DISC identifies your important IT assets and helps protect them to reduce business risk and ensure business continuity.
- ✦ DISC offers a high level risk assessment to analyze the security posture of your business for only \$47. This is a proprietary evaluation program which will take 30 minutes of your time. This assessment will help demonstrate how we can work together to build a strategically sound information security program aligned with your business goals.
- ✦ DISC believes in community service and offers a special discount for non-profit organizations.
