

Level 4 merchant PCI compliance program

Are you a small to medium size business with a store front or multi level business without a store front (such as Mary Kay, Monavie, Isogenix, Nikken, Arbonne etc..) who collects or processes credit card transactions? If you are a merchant who accepts or processes payment cards, you must comply with the PCI DSS to protect the customers information collected.

February 2009 Sonoma county restaurant Mary's Pizza was hacked by overseas hackers, who swiped the restaurant patron's credit card information to possibly steal their identity. Retail business which fails to comply and have a security breach will be subject to penalties and fines, possibly lawsuits, and may lose their credit card processing capability.

DISC helps level 4 merchants to comply with PCI DSS (Payment Card Industry & Data Security Standard) contractual agreement and offers an assessment plan that addresses their compliance needs. Compliance with PCI helps to alleviate vulnerabilities and protect card holder data.

DISC has Vulnerability Assessment Platform for mandatory scanning requirement

It's about risk reduction & PCI compliance

- Most small to medium size companies don't have experienced information security professionals on their staff.
 - Most entrepreneurs and professionals fail to recognize the challenge of identifying and prioritizing the information security risks necessary for business to succeed and comply because you're busy with daily business operations making money.
 - Over 85% of security breaches happen to businesses such as yours
- ✦ DISC has put together an assessment plan for those of you who store, process or transmit cardholder data. We help you with short term information security goals and developing successful long term strategic objectives.
- ✦ DISC determines the correct SAQ (self assessment questionnaires) and applicability of the assessment scope based on profile assessment questionnaires.

What is your merchant level?
