

Symantec Protection Suite SBE Features

Symantec Protection Suite Small Business Edition is an easy to use, "all-in-one" suite that protects critical business assets by securing against today's complex malware and spam threats and by rapidly recovering data or computer systems. It includes proven technologies that provide multiple layers of protection to ensure your computer systems and information are secure and readily available at all times.

Key Features

- **Proactive technologies provide end to end protection** against unknown threats for laptops, desktops and messaging servers
- **Recover critical data in seconds** or entire computer systems in minutes, even to different computer systems or virtual environments
- **Easy management** and optimized resources help simplify implementation and quickly deploy with minimal disruption to your environment
- **Identify and control the flow of sensitive information** via email so that your business reputation is protected

Key Benefits

- Delivers multiple layers of protection for your business with the market-leading endpoint security, messaging security, and data and system protection vendor
- Ensures systems and critical information are readily available
- Simple to install, deploy and manage
- Streamline processes and eliminate additional steps and costs with one decision, one purchase, and one vendor for complete protection
