### vCISO pricing:

**Hourly Rate Model:** A set hourly rate for our services ranges from \$175 to \$300 per hour, depending on consultant experience and expertise in a typical project. This model is best suited for organizations requiring ad-hoc security support or consultation.

**Retainer Model:** The organization pays a fixed monthly fee for a predetermined set of services and support. Typically ranges from \$2,000 to \$20,000 per month.

## GRC platform and vCISO services pricing

**Project-based Model:** The [vCISO](#) charges a fixed fee for a specific project or engagement. The cost for project based engagements varies depending on the scope and complexity of the project but can range from \$5,000 to \$50,000 or more.

DISC vCISO service provides you with a board-level expert who can virtually become a part of your company, overseeing your security strategy, and the effectiveness of your risk and regulatory programs.

### Resources That Align With Your Business Needs

Many organizations have not yet implemented an effective cybersecurity program, often due to constraints in time, money, and resources, or simply because it hasn't been a priority. For some, the prospect of establishing a cybersecurity program can be a daunting journey they feel unprepared to undertake.

	<b>Dedicated Time</b>	<b>Annual Savings</b>
DISC eliminates the obstacles and uncertainty associated with implementing a cybersecurity program by allowing organizations to outsource security and risk management to a qualified CISO at a fraction of the cost of a full-time employee.	1 day per month	\$179,000
	0.5 day per week	\$139,000
	1 day per week	\$79,000

The annual cost of employing a full-time CISO ranges from \$200,000 to well over \$1 million. However, in our extensive experience, most organizations rarely need a full-time CISO. DISC can collaborate with your organization, leveraging its current cybersecurity strengths and addressing its deficiencies to design a tailored cybersecurity program that aligns with your business objectives.

### About DISC

Since 2001, DISC has been a security consulting firm specializing in protecting electronic, intellectual, and financial assets through a distinctive combination of assessment, building program, advising, and training.
